## (1) Outline

(2) Introduction
(3) FastKwic

4 Implementation in the TermSciences website
(5) Conclusion

## Contexte

- TermSciences: more than 540,000 terms BUT no definitions.
- Large collection of bibliographical records at INIST.
- Previous work on term variation [Jacquemin 1994, Jacquemin and Royauté 1994, Jacquemin 1997, Royauté 1999].
$\Rightarrow$ Wish for a concordancer.

## Elements for the specification

- No complex request language.
- Mono- and multi-word terms ...
- ... occuring in texts with several variations.

## Term variations (Jacquemin, Royauté)

## Example

- gamma-linolenic acid / gamma linolenic acid / $\gamma$-Linolenic acid.
- stuctural gene / structural erm gene.
- structural gene / structural and regulatory genes.
- resistance mechanism / mechanism of claritomycin resistance.

## Major types

- typographical variations (ex. with or without -).
- morphological variations (ex. plural).
- syntactic variations (ex. insertion, coordination, permutation).

## Package features

- Two UTF-8 compliant Perl modules.
- Depends on several external freely available tools/resources
- FASTR [Jacquemin 1997, Jacquemin et al. 1997],
- TreeTagger [Schmid 1997],
- Flemm [Namer 2000]
- Freely available on http://www.cnrtl.fr/outils/.

Usage

## Usage

- Resource compilation.

## Usage

- Resource compilation.
- Indexing.

## Usage

- Resource compilation.
- Indexing.
- Production of a concordancer.

## Limitations

- Use of TreeTagger with limited context $\Rightarrow$ errors in the POS tagging.
- Particular linguistic entities (1,3,4-thiadiazole(2-amino)) and their variants not taken into account.

## Resources, corpus

- Terminological resource $=$ more than 540,000 terms $\Rightarrow$
- FASTR: only for terms with standard linguistic patterns.
- IRC3(Royauté): for geographical names, drug names, chemical compounds, etc.
- Corpus $=30,744$ records for French, 398,952 for English.
- Result of indexing put in MySQL database and accessed from http://www.termsciences.fr/-/Index/Search/Concordancer/

## Result example

Sign in $\mid$ Help $\mid \mathbf{I}$<br>Francais

## Termsciences <br> Portail terminologique multidisciplinaire

DOCUMENTARYZONE
G) Concordancer

Enter term. The term will be aulomatically completed according to the contents of the terminological database

## Terminological zone

1. Check terms in the lett part.
2. Search for terms and thelr variants into the PASCAL 2005 concordancer.

results: 1-8

## Achievements and perpectives

- FastKwic freely available for the community http://www.cnrtl.fr/outils/.
- Possible improvements:
- integration of new languages
- linking FastKwic to a terminology extraction tool (ex. ACABIT)

1. and you, my lady, are the living image of him!" "THANK YOU, my lady." "The duke will never be dead 002. if you want. I'm not doing anything important." "THANK YOU," said Karen. "You're very kind. I've go
